EXPERIENCE

CURRENT TIMELINE No:

During every summer break, I work as an encoder for our local municipality.

About me

As a current BSIT student, I'm in the process of developing a versatile skill set. I'm learning effective communication in personal contexts, navigating ethical considerations in computing, and honing my ability to collaborate within teams. Additionally, I'm exploring current and emerging technologies while focusing on understanding user needs. I recognize there's much more to learn and explore in this dynamic field.

While I've made significant strides in these areas, I acknowledge that I'm still in the process of becoming an expert. There's a wealth of knowledge and experience yet to be gained, and I eagerly embrace the continuous learning inherent in the realm of Information Technology.

EDUCATION:

Tertiary: BS in Information Technology at Bohol Island State University (Balilihan Campus)

Secondary: Cong. Pablo Malasarte National Highschool

Primary: Balilihan Central Elementary School
